

# Learn, Engage, Apply and Perform

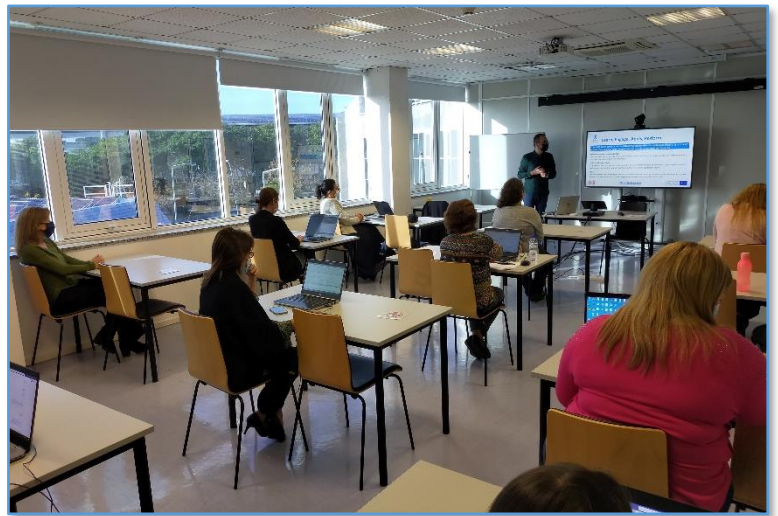

Newsletter 5, December 2020

## LEAP events are taking place across Europe

The LEAP project partners have been holding multiplier events in their countries to present LEAP outputs to stakeholders. **Some of the events are taking place face-to-face and other online, as European countries are currently under many restrictions** regarding people gatherings due to COVID-19.

Partners that did not carry out their events yet have plans to deliver them in-person or online, depending on the updating of restrictions in each country.

Multiplier Event in Portugal

## Taking the LEAP - Policy Report

**During the last year the world has seen the spread of the COVID-19** leading to a pandemic. Governments across the world have implemented travel bans, lockdowns, and limits to public gatherings. **This has impacted on all aspects of day-to-day living, working, and studying.**

Thus, it has also changed the way VET institutions are delivering their courses. **It has resulted in accelerating the introduction of technology enhanced learning and the use of remote learning and assessment.** Whilst the LEAP project was already addressing digital challenges faced by the VET sector, the COVID-19 pandemic has made LEAP even more relevant and important.

**The LEAP Policy Report - the project final output - considers the wider use and importance of e-portfolios in VET.** It draws from the experience of the LEAP project partners as well as current research and best practice.

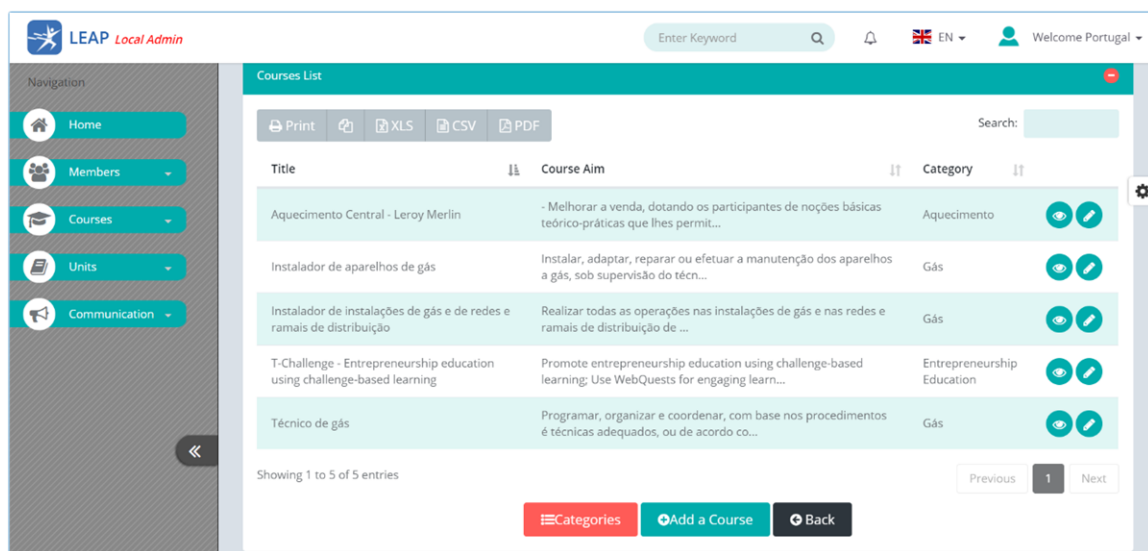

## LEAP Website <https://e-leap.eu>

The LEAP website is the place to go to find all the information you need to know about our project. There we have available the project outputs, namely the **Good Practice Handbook** (output 2) and the **Policy Report** (output 3), as well as **partners' details and contacts** so you can keep in touch with us. In addition, the **newsletters and articles** we released during the three years of the project are also available there so you can see how we have progressed.

## LEAP App <http://app.e-leap.eu>

The highlight of our project - the **LEAP App** (output 1) - reached its final version after being improved considering the feedback collected during pilot sessions. LEAP e-portfolios platform allows that training coordinators (moderators) organize trainings on it, that students upload their works and that trainers evaluate them online. This can be done from any computer, tablet or smartphone, at any time and any place. Start using our app and benefit from all the advantages of having a single place to connect all the parts involved in a training. Take a LEAP with us!

**Thank you for having joined us during the last 3 years!**
